SINGLE COMPONENT**

## RD-MONOGUARD

**New generation anti-corrosion coating**

eco-friendly – fast drying – outstanding performances – easy application

**C4**

**C5**

- » Developed for harsh industrial and marine environments
- » Very good adhesion to steel, zinc, stainless steel, etc.
- » Extremely fast drying time
- » Primer and top coat in one, UV and weathering resistant
- » No sandblasting required
- » Application by brush, roller or spray

High Performance coating formulated with a mix of new generation acrylic resins and innovative anti-corrosion additives.

Enables the achievement of long-term protection against corrosion with less thickness compared to classic systems. A film of 200 µm will prevent the development of corrosion on steel exposed to harsh industrial and marine conditions (C5i/C5m).

Available in RAL and NCS colors: satin or semi-gloss, and transparent: matt, satin or semi-gloss.

### Application on a wide variety of substrates

- ✓ steel, cast iron
- ✓ CorTen steel
- ✓ new and old galvanized steel
- ✓ stainless steel
- ✓ aluminium
- ✓ old painted surfaces

### Cost saving solution for renovation projects thanks to:

lower costs for surface preparation • shorter downtime and less labor costs thanks to faster and easier application • proven durability

**Steel structures:**  
bridges, flyovers, pipelines, towers,  
pipe racks, beams, etc.

**Reservoirs:**  
silos, oil tanks, water tanks, etc.

**Metallic objects:**  
balustrades, fences, railings,  
shelves, doors, etc.

**Equipment:**  
cranes, trailers, containers, machines, etc.
