

**WATERBORNE  
SINGLE COMPONENT**

## RD-E-DECK

### Waterproofing of flat roofs and shingles

eco-friendly – fast drying – easy application

- » Very good adhesion to cement, concrete, wood, etc.
- » Very good adhesion to bituminous roofing older than one year
- » Primer and top coat in one, UV and weathering resistant
- » Simple surface preparation
- » Application by brush, roller or spray

RD-E-Deck is a reliable liquid waterproofing system that can be used on a wide variety of projects.

When applied in the prescribed thicknesses, RD-E-Deck will procure a durable waterproofing solution that can be combined with other RD Coatings products to offer additional functionalities to the system such as: color effects, I.R. reflection, traffic resistance, etc.

On flat roofs, seams or cracks, the use RD-Roof Fleece is recommended as it will highly increase the durability of the system. The use of RD-Roof Fleece is very simple and doesn't interfere in the rapidity of installing the waterproofing solution.

### Application on a wide variety of substrates

- ✓ old bitumen
- ✓ concrete, cement
- ✓ weathered supple PVC and EPDM
- ✓ wood
- ✓ old painted surfaces

drying  
time

permanent  
elasticity

low  
VOC content

### Simple and cost-effective solution for various kind of projects:

old bituminous roofing – corrugated bituminous roof – bituminous tiles – asbestos tiles and roofs
